

HUD Launches Full Website Search on the HUD Exchange

HUD launched a full website search on the [HUD Exchange](#) today. Previously, the website's search scope included the Resource Library (abstracts and files) and FAQs only. The full search shows results from all areas of the website that don't require a login to access.

You can now use the search to find pages, resources, trainings, news, FAQs, grantees, reports, and other content. Users will be able to filter results by topic and by content type.

The search will remain powered by the Google Search Appliance which adapts to user behavior, learning to deliver better results over time. Links that get more clicks automatically move up in the search ranking.

We welcome your feedback on the performance of the full website search after it launches. Please email info@hudexchange.info to let the website team know the search terms you entered, if the results meet your expectations, and if not, what specific results you expected to see.
